Profile

An experienced frontend engineer with 3 years of experience adept at capturing the intersection between development and design through rich interactive and responsive applications. Highly proficient at testing, debugging, solving business problems, and able to effectively work independently as well collaborate with a team and guide towards the desired outcome.

Employment History

Software Engineer, Norebase, Lagos

MAY 2022 – PRESENT

- Deploying bug fixes, features, and optimizing codebase to increase web performance and core web vitals from 60% to 90 – 100%
- Fixing, assigning, and tracking errors reported on all company applications by application insights/sentry on Azure Portal to improve system reliability.
- Writing tests using Jest and React Testing Library to ensure high test coverage of company products
- Collaborating with product, legal, and backend teams throughout SDLC to implement features and analyze end results.
- Rebuilding internal portal using React/React-Query to improve operations processes and reduce bug rate from 50% to less than 10%

Frontend Engineer, ITScopesolutions, Lagos

JULY 2020 – MAY 2022

- Assisted in defining frontend engineering best practices and processes which resulted in a 50% increase in team efficiency, collaboration, and a neater codebase.
- Collaborated with designers to build interactive and engaging interfaces that resulted in 70% customer satisfaction in all projects, also ensuring clients' expectations, design, and business logic are in sync.
- Designed and built responsive websites and web applications using Nextjs, React & Redux/Context Api for state management.
- Deployed frontend applications utilizing AWS Amplify, Netlify & Vercel
- Analyzed business requirements of various clients and coordinated frontend team from project scoping to development to deployment.
- Built private community web portal with React, Redux toolkit and Chakra UI. Portal features dark mode, 2 admin levels and a live feed amongst others.

Frontend Developer, Tony Osime & Associates, Lagos

APRIL 2019 – AUGUST 2019

- Co-designed, managed and monitored company site for performance and increased page visits, search engine ranking, user experience and site interface.
- Reviewed and tweaked weekly articles on digital transformation and technology to appeal to target audience and increased page visits by 10%.
- Prepared weekly progress reports which enabled the management team to make better business decisions based on the numbers.
- Optimized images and code to increase Time on Page by 30 seconds using CDN and caching which increased page ranking by 100% and reduced bounce rate.
- Optimized site SEO and increased page ranking from 3rd page to 1st page on Google search engine utilizing compelling keywords amongst other measures.
